

GREGORY L. FENVES

Emory University
505 Kilgo Circle
Atlanta, GA 30322

+1-404-727-6013
president@emory.edu

LEADERSHIP POSITIONS

2020	President Emory University
2015–2020	President The University of Texas at Austin
2013–2015	Executive Vice President and Provost The University of Texas at Austin
2008–2013	Dean, Cockrell School of Engineering The University of Texas at Austin
2002–2007	Chair, Department of Civil and Environmental Engineering University of California, Berkeley
1997–2002	Assistant Director for Lifeline Programs, Pacific Earthquake Engineering Research Center, University of California, Berkeley
1994–1996	Vice Chair for Graduate Affairs, Department of Civil and Environmental Engineering, University of California, Berkeley

ACADEMIC APPOINTMENTS

2020	Professor, Department of Computer Science Emory College of Arts and Sciences Emory University
2020	Cockrell Family Chair Emeritus in Engineering #15 Cockrell School of Engineering The University of Texas at Austin
2015–2020	Cockrell Family Chair in Engineering #15 Cockrell School of Engineering The University of Texas at Austin
2008–2020	Professor, Department of Civil, Architectural, and Environmental Engineering The University of Texas at Austin
2001–2008	Member of the faculty, <i>European School for Advanced Studies in Reduction of Seismic Risk</i> (ROSE School), University of Pavia, Italy
2008	Visiting Professor, Disaster Prevention Research Institute Kyoto University, Japan
1998–2008	T.Y. and Margaret Lin Professor of Engineering Department of Civil and Environmental Engineering University of California, Berkeley
1994–1998	Professor, Department of Civil and Environmental Engineering University of California, Berkeley
1990–1994	Associate Professor, Department of Civil and Environmental Engineering University of California, Berkeley

- 1988–1990 Assistant Professor, Department of Civil Engineering
University of California, Berkeley
- 1984–1987 Assistant Professor, Department of Civil Engineering
The University of Texas at Austin

EDUCATION

- Doctor of Philosophy, Department of Civil Engineering, University of California, Berkeley,
May 1984
- Master of Science, Department of Civil Engineering, University of California, Berkeley,
June 1980
- Bachelor of Science with Distinction, School of Civil and Environmental Engineering,
Cornell University, June 1979

MAJOR AWARDS

- Advocate to Higher Education Award, Public Relations Society of America, 2022
- Hope for Humanity Award, Dallas Holocaust Museum, 2018
- Grand Award, Cicero Speechwriting Awards (with Matthew Kivel), 2018
- Guardian of the Human Spirit Award, Holocaust Museum Houston, 2017
- Philosophical Society of Texas, elected member, 2017–2020
- Texas Academy of Medicine, Engineering, Science, and Technology (TAMEST), member, 2015–2020
- National Academy of Engineering, elected member, 2014
- Mexican Academy of Engineering, corresponding member, 2014
- Academy of Distinguished Alumni, Department of Civil and Environmental Engineering,
University of California, Berkeley, 2013
- J. James R. Croes Medal, American Society of Civil Engineers, 2009
- Walter L. Huber Research Prize, American Society of Civil Engineers, 1995
- Moisseiff Award, American Society of Civil Engineers, 1993
- Raymond C. Reese Research Prize, American Society of Civil Engineers, 1989
- Presidential Young Investigator Award, National Science Foundation, 1987

HIGHER EDUCATION BOARDS AND ACTIVITIES

- University Athletic Association, Presidents Council, 2020–present
- Georgia Independent College Association, Board of Directors, 2020–present
- Atlanta Regional Council for Higher Education, Board of Directors, 2020–present
- APLU (Association of Public and Land-grant Universities), Research Intensive Committee, 2018–2020
- APLU “Powered by Publics: Scaling Student Success,” cluster leader, 2018–2020
- College Football Playoff Administration, LLC, Board of Managers, 2018–2020
- University Research Association, Board of Trustees, 2017–2020
- University Innovation Alliance, Board of Directors, 2015–2020
- Big 12 Conference, Board of Directors, 2015–2020; Secretary/Treasurer, 2016–2020
- LBJ Foundation, ex officio member, Board of Directors, 2015–2020
- Dedman Foundation, Board of Directors, 2015–2020

COMMUNITY SERVICE

- Georgia Research Alliance, Board of Trustees, 2020–present
- Metro Atlanta Chamber of Commerce, Board of Directors, 2020–present
- Atlanta Committee for Progress, Board of Directors, 2020–present
- The Carter Center, Board of Trustees, 2020–present
- Woodruff Fund, Board of Directors, 2020–present
- Greater Austin Economic Development Corporation, Board of Directors, 2016–2020
- Mayor’s Task Force on Institutional Racism and Systemic Inequity, City of Austin,
task force member, 2016
- E3 Alliance (Education Equals Excellence), Austin, Texas, Board of Directors, 2015–2016

UNIVERSITY SERVICE

University of Texas at Austin

Steering Committee for the Dell Medical School, 2012–2013; chair, 2013–2014
Ex Students Association (Texas Exes), Board of Directors, 2014–2015
Search Committee for Founding Dean of the Dell Medical School, 2013
Strategic IT Accountability Board, 2009–2012; 2013–2015
Executive Compliance Committee, 2008–2011; 2013–2015
Facilities and Space Council, 2013–2015
Internal Audit Committee, 2013–2015
UT System Chancellor’s Cabinet on Technology Commercialization, 2012–2014
UT System Regental Task Force on Intellectual Property, 2014
UT System Task Force on Engineering Education, 2012–2013
Master Plan Advisory Committee, 2011–2012
Search Committee for Dean of the College of Natural Sciences, 2011–2012
Executive Committee for the Engineering Education and Research Center Project, 2010–2013
Chair, Committee on Regulatory Costs, 2010–2012
Search Committee for Dean of the Jackson School of Geosciences, 2009–2010

University of California, Berkeley

Task Committee on Educating Leaders, College of Engineering, 2003–2004
College Executive Committee, College of Engineering, 2002–2007
Group Leader, Structural Engineering, Mechanics and Materials, CEE Department, 2001–2002
CITRIS Executive Committee (Center for Information Technology Research in the Interest of Society),
UC Berkeley, 2001–2003
CITRIS Building Program Committee, UC Berkeley, 2001–2002
Richmond Field Station Study Committee, UC Berkeley, 2000–2002
Civil Systems Committee, CEE, 2000–2002
Seismic Review Committee, UC Berkeley, 1998–2002
Research Committee, Pacific Earthquake Engineering Research Center, 1997–2007

TEACHING AND MENTORING

Undergraduate courses taught 1999–2007, UC Berkeley (10 classes, total of 685 students)

CE 92, Introduction to Civil and Environmental Engineering
CE 120, Structural Engineering
CE 121, Advanced Structural Analysis
CE 192, Art and Science of Civil and Environmental Engineering Practice

Graduate courses taught 1999–2007, UC Berkeley (8 classes, total of 253 students)

CE 221, Nonlinear Structural Analysis
CE 222, Finite Element Methods
CE 224, Computer Aided Engineering
CE 225, Dynamics of Structures

Graduate Student Supervision

Completed supervision of 16 PhD students (4 co-supervised) at UC Berkeley, one PhD student at the University of Texas at Austin, and two PhD students at the ROSE School, University of Pavia, Italy. Seven former PhD students hold faculty appointments. Four former PhD students have received a CAREER Award and one a PECASE Award from the National Science Foundation.

EXTRAMURAL RESEARCH GRANTS

- Towards Petascale Simulation of Urban Earthquake Impacts* (Co-PI, in conjunction with Carnegie Mellon University; National Science Foundation; 2007–2013)—Develop methodologies, capability, and software for high-fidelity physics-based petascale simulations of urban regions to assess the engineering of large magnitude earthquakes on buildings, transportation system components, and the underground civil infrastructure. Include the interaction between the soil, the foundation and large inventories of structures; the interaction between structures in densely built areas; and the effect of the structures on the ground motion as well as the nonlinear soil behavior. Integrate with computational databases and scalable visualization tools.
- Software Framework for Earthquake Engineering Simulation* (PI; Pacific Earthquake Engineering Research Center from the National Science Foundation; 1997–2007)—Lead creator of comprehensive, object-oriented simulation framework for structural and geotechnical systems, including robust models, equation solvers, and algorithms; parallel and distributed processing applications. Open System for Earthquake Engineering Simulation (OpenSees)
<http://opensees.berkeley.edu/>.
- CITRIS-Center for Information Technology Research in the Interest of Society* (Co-PI; National Science Foundation; 2001–2007)—This was a \$7.5 million NSF ITR grant, with Prof. J. Demmel (EECS), as principal investigator. Responsible for a new sensor network for structural health assessment of bridges. A wireless MEMS sensor unit has been developed and will be deployed in a wireless network on the Golden Gate Bridge for dense spatial sensing of vibration characteristics, globally and locally. A new class of distributed system identification has been developed to minimize the communication needed for computing correlations between signals.
- NEES Simulation Component* (PI for subaward from San Diego Supercomputer Center, National Science Foundation; 2005–2009)—Continue to develop OpenSees for the Network for Earthquake Engineering Simulation (NEES) simulation services. Develop parallel version for TeraGrid and DataStar high-performance computers at San Diego Supercomputer Center. Create data interfaces for NEES repository. Provide interfaces for portal to OpenSees using GridSphere and other portal middleware.
- Seismic Performance of Bridge Systems with Conventional and Innovative Materials* (Co-PI, National Science Foundation; 2005–2009)—A collaborative project to extend the NEES demonstration project to improve design and analysis of bridge systems using innovative materials. Expand the simulation to include the effect of abutments and innovative methods for improving seismic performance, such as self-centering columns and composite materials.
- NEES System for Studying Soil-Structure-Foundation Interaction* (PI for collaborative project, National Science Foundation; 2003–2007)—Use NEES experimental sites to improve understanding of SFSI on bridges. Develop and calibrate advanced nonlinear models of bridge components against shaking table, centrifuge, in situ, and quasi-static tests. Investigate the system response of prototype bridges for a range of soil, foundation, and structural effects.
- NEESgrid Simulation Component* (PI for subaward from University of Illinois at Champaign-Urbana, National Science Foundation; 2003–2004)—Develop computational simulation capability using OpenSees for structural and geotechnical applications. Interact with NEESgrid team at NCSA on integrating simulation capability, including database interfaces, into NEES systems.
- Seismic Performance of Urban Regions* (PI; Mississippi State University subaward from the National Science Foundation, in conjunction with Carnegie Mellon University; 1999–2006)—Develop new simulation models of buildings and infrastructure in urban regions to estimate damage and vulnerability; create collaborative software framework for earthquake source modeling, regional geophysical features, and structural models with distributed processing and visualization methods.
- Earthquake Vulnerability of Electrical Substation Equipment* (PI; Pacific Gas & Electric Company; 1998–2004)—Experimental testing and analytical investigation of seismic vulnerability of transformer bushings and disconnect switches; qualification standards and characterization of fragility.

OTHER EXTRAMURAL RESEARCH GRANTS

- Simplified Earthquake Analysis Procedures for Bridges* (PI; California Department of Transportation; 1999–2002)
- Protective Systems for Bridges* (Co-PI; California Department of Transportation; 1995–2000)
- Earthquake Analysis of Bridges* (PI; California Department of Transportation; 1995–1998)
- Material Models for Earthquake Analysis of Concrete Dams* (PI; U.S. Bureau of Reclamation; 1992–1996)
- Evaluation of Interstate 10/215 Connector* (PI; California Division of Mines and Geology; 1993–1994)
- Earthquake Analysis of Gravity Dams* (PI; National Science Foundation; 1990–1993)
- Nonlinear Analysis of Concrete Arch Dams, Phase II* (PI; U.S. Bureau of Reclamation, County of Los Angeles, Harza Engineering Company; 1992–1993)
- Qualitative Reasoning of Structural Behavior* (PI; National Science Foundation; 1991–1993)
- Engineering Database for Seismic Assessment of the Bay Bridge* (Co-PI; California Department of Transportation; 1990–1993)
- Retrofitting Multi-Level/Multiple Column Structures* (Co-PI; California Department of Transportation; 1990–1993)
- Evaluation of the Dumbarton Bridge in the Loma Prieta Earthquake* (PI; California Department of Transportation; 1990–1992)
- Nonlinear Analysis of Concrete Arch Dams, Phase I* (PI; U.S. Corp of Engineers, County of Los Angeles, EPRI, PG&E, Harza Engineering Company; 1988–1990)
- Evaluation of Lateral Earthquake Force Procedures in Building Design* (PI; California Division of Mines and Geology; 1989–1990)
- Evaluation of Soil-Structure Interaction in Buildings* (PI; California Division of Mines and Geology; 1988–1989)
- Anchorage Zone Reinforcement in Post-Tensioned Girders* (Co-PI; National Cooperative Highway Research Projects; 1986–1989)
- Behavior of Wire Fabric Reinforced Columns* (Co-PI; Reinforced Concrete Research Council; 1986–1987)
- Analysis of Curved Steel Girder Units* (Co-PI; Texas Department of Highways; 1985–1987)
- Nonlinear Dam-Water Interaction Effects in the Earthquake Response of Concrete Dams* (PI; National Science Foundation; 1985–1987)

PROFESSIONAL AFFILIATIONS AND MAJOR ACTIVITIES

- American Society of Civil Engineers, Fellow
- Structural Engineering Institute (of ASCE), Fellow
- Earthquake Engineering Research Institute, Member
- American Association for the Advancement of Science, Member
- Committee on Grand Challenges in Earthquake Engineering: A Community Workshop, National Research Council, Co-Chair, 2010–2011
- Structural Identification of Constructed Systems Committee, Structural Engineering Institute, American Society of Civil Engineers, 2006–2011
- Strong Motion Instrumentation Advisory Panel, Golden Gate Bridge District, 1998–2008; Chair, 2006–2008
- NEES IT Vision Committee, Network for Earthquake Engineering Simulation, 2006–2007
- Research Policy Committee, Earthquake Engineering Research Institute, Chair, 2004–2006
- Panel on Research Agenda for Earthquake Engineering, Earthquake Engineering Research Institute, 2001–2003
- Methods of Analysis Committee, Structural Engineering Institute, American Society of Civil Engineers, 1998–2004
- Dynamic Effects Administrative Committee, Structural Engineering Institute, American Society of Civil Engineers, Chair, 1997–2000
- ASCE Steering Committee for 1998 Structural Engineers World Congress, Chair, 1995–1998
- CUREe, Elected At-large Member of Board of Directors, 1995–1999

Seismic Effects Committee, Structural Division, American Society of Civil Engineers, 1986–1997, 2002–2009; Publications Secretary, 1990–1993; Chair, 1994–1997
Computer-Aided Design and Analysis Committee, Structural Division, American Society of Civil Engineers, 1991–1998
Database Committee, Technical Council on Computer Practices, American Society of Civil Engineers, 1988–1998
Dynamics Committee, Engineering Mechanics Division, American Society of Civil Engineers, 1984–1992
Panel on Earthquake Engineering for Concrete Dams, Committee on Earthquake Engineering, National Research Council, 1986–1988

EDITORIAL ACTIVITIES

Editorial Board, *Earthquake Engineering & Structural Dynamics*, 2012–2016
Guest Editor, *Earthquake Engineering & Structural Dynamics*, April 2009
Editorial Board, *Earthquake Spectra*, EERI, 2002–2008
Editorial Board, *Journal of Earthquake Engineering*, 2002–2008
Associate Editor, *Journal of Structural Engineering*, ASCE, 1990–1993
Guest Editor, *Journal of Computing in Civil Engineering*, ASCE, July 1992

SELECTED PROFESSIONAL CONSULTING

Applied Technology Council, Redwood City, CA, 2007–2009; develop guidelines for performance-based earthquake engineering.
California Department of Transportation, 2006–2008; member of Seismic Advisory Board, reporting to Caltrans Director.
Lawrence Livermore National Laboratory, 2004–2006; member of review panel providing oversight of transportation safety study.
Lawrence Livermore National Laboratory, 2003–2004; chair of review panel for ground vibration study.
T.Y. Lin International, San Francisco, 1998–1999; design of the new Bay Bridge.
Applied Technology Council, Redwood City, CA, 1998–2002; develop new national seismic bridge specifications.
